

NeumanTree Replacement Bulb Order Form

Please note that only bulbs resembling the illustration above are available.

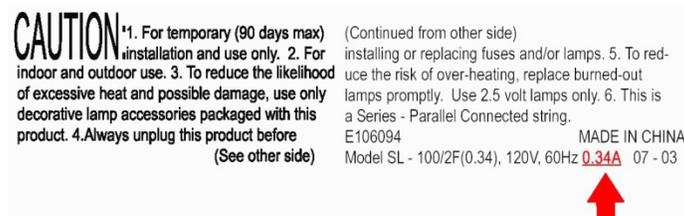

As you may know the golden rule in maintaining your lighting system is to simply **replace any light bulb that has burned out, as soon as you notice it.** Doing this properly maintains the voltage among all of the lights in the set. Your light sets are designed to stay lit even if a bulb naturally burns out. However, once one light burns out the remaining lights in the set begin to work harder by taking the energy of the burnt out bulb.

In order for a customer to maintain the lights on their tree for the entire warranty period of the construction, we offer replacement bulbs for a period of 10 years. After completing your replacement bulb order form we highly recommend that you view a quick 3 minute video on how to repair and maintain the lights on your tree, it can be found on the customer service page of our website where this form was located.

<http://www.neumantree.com/service.html>

The cost for shipping and handling is \$20.00 for every 100 replacement bulbs delivered to your door. If you would like to order replacements and your tree does not have green warning labels (**attached to each light cord next to the trunk, not the extension cord of the tree**), please review the white tag below to determine the correct milliamp (brightness) of your bulbs.

Please note that utilizing the incorrect brightness of bulbs will corrupt your light sets.

If the caution labels on each light cord next to the trunk are white please note that if the number from your tag is either 0.17A or 0.34A as shown, these bulbs are no longer available.

In other words we no longer stock any bulbs other than 200 MA or 0.20A. utilizing the incorrect brightness of bulbs will corrupt your light sets.

For more detailed information on how to get the brightness of your bulbs simply go back to the website and click on **How to determine bulb brightness** from the customer service page.

Finally, we strive to get your replacement bulbs sent out the same day we receive your information and check. **We recommend that you save this page of the form for further reference** and consider the purchase of a **LightKeeper Pro** to help maintain the lights on your tree.
