

Please refer to the illustration below to correctly plug the middle section "B" into the bottom section "A".
Feel free to call NeumanTree, Inc. at 866/865-8733 with any questions you may have!

**Unplug these two light sets, and
replace one each behind the 2
plugs pictured above.**

**Once you have removed the lower plugs,
you can then plug in the section "B"
extension cord to the section "A"
receptacle and complete the "S"
connection.**

Please note, since all of the light sets are individually fused it is acceptable to plug as many as desired back to back into one another.
